CODE HILLS 1001

BUSINESS PLAN

Rwandan Premium Tea

High-Altitude CTC & Orthodox Tea

From Small Ideas. Big Impact.

A practical business-planning guide for turning a Rwandan natural resource into a value-added opportunity.

RESOURCE	**Rwandan Premium Tea**
BUSINESS THEME	Premium • Fresh • Origin • Refined
APP ROLE	Selectable business plan in the Code Hills 1001 Natural Resources portal.

Prepared for the Code Hills 1001 app

1. Business Opportunity

Rwandan premium tea is highlighted through high-altitude CTC and orthodox tea varieties.

The Code Hills approach is to help founders move from a natural resource to a practical, market-facing product idea. The business plan should therefore connect the resource, product concept, customer, production workflow, packaging, pricing strategy, distribution and growth path.

2. Product & Opportunity Map

Opportunity Area	What the founder can explore
Premium packaged tea	Define the product, target customer, quality requirements, packaging and route to market.
Tea gift sets	Define the product, target customer, quality requirements, packaging and route to market.
Hospitality supply	Define the product, target customer, quality requirements, packaging and route to market.
Branded specialty tea	Define the product, target customer, quality requirements, packaging and route to market.

3. Target Customers

Potential customer groups identified for this concept include:

- Tea consumers
- Hotels and cafés
- Gift markets
- Specialty-food retailers

4. Value Proposition

Resource	Rwandan Premium Tea
Customer need	A useful, attractive and trustworthy value-added product.
Founder response	Transform the resource through a defined process, strong packaging and a clear market position.
Differentiation	Rwandan origin, responsible sourcing, quality, storytelling and product presentation.

5. Production & Delivery Workflow

Use the following workflow as the planning backbone. Exact processing methods, safety requirements and regulatory steps should be confirmed for the specific product before commercial production.

1	Tea sourcing	Define responsible person, equipment, quality check and record for this stage.
2	Leaf quality selection	Define responsible person, equipment, quality check and record for this stage.
3	Processing	Define responsible person, equipment, quality check and record for this stage.
4	Blending where appropriate	Define responsible person, equipment, quality check and record for this stage.
5	Packaging and labeling	Define responsible person, equipment, quality check and record for this stage.
6	Retail / hospitality distribution	Define responsible person, equipment, quality check and record for this stage.

6. Business Model Canvas

Key Partners	Key Activities	Value Proposition
Suppliers / producers Packaging partners Retail & distribution partners	Sourcing Processing Quality control Branding & sales	**Rwandan natural-resource value Useful product Quality presentation**
Customer Relationships	Channels	**Customer Segments**
Education Trust & quality After-sales feedback	Direct sales Retailers Hospitality Digital promotion	**Tea consumers Hotels and cafés Gift markets Specialty-food retailers**
Key Resources	Cost Structure	Revenue Streams
Natural resource Skills Equipment Brand	Sourcing Processing Packaging Marketing Distribution	**Product sales Wholesale orders Retail sales Potential value-added services**

7. Financial Planning Framework

The Code Hills app can use this section to help a founder build a real budget. No fixed prices are assumed here; the founder should enter current supplier, labor, packaging, transport and marketing prices for the chosen city.

Planning Area	Founder should determine
Startup equipment	Required tools, equipment and one-time setup costs

Planning item	Founder should determine
Raw materials	Quantity required per production batch × current supplier price
Packaging	Containers, labels, seals, cartons and presentation materials
Labor	Production, quality control, sales and administration
Transport	Sourcing, delivery and distribution costs
Marketing	Branding, content, promotion and customer acquisition
Selling price	Cost per unit + target margin + market validation
Break-even	Fixed costs ÷ contribution margin per unit

8. Marketing & Brand Strategy

Brand story	Position Rwandan Premium Tea as a Rwandan resource with a clear origin-to-product story.
Packaging	Use clean, informative packaging with product name, ingredients/material information where applicable, usage guidance and contact details.
Digital presence	Use product photography, short educational videos, social media content and the Code Hills app as discovery channels.
Trust	Document quality checks, sourcing information and product handling practices.
Market testing	Start with a small test batch, collect customer feedback and refine the product before scaling.

9. Growth Path

Stage	Focus
Small	Validate product quality, customer demand and production workflow.
Medium	Improve equipment, packaging, distribution and repeat sales.
Large	Build stronger supply networks, larger production capacity and broader markets.

10. Founder Action Checklist

- ■ Define the exact product to be sold.
- ■ Identify reliable and responsible sources of the resource.
- ■ List equipment, materials and skills required.
- ■ Create a small prototype or test batch.
- ■ Test quality and collect customer feedback.
- ■ Calculate real production cost using current local prices.
- ■ Set a validated selling price and margin.
- ■ Design packaging and product information.
- ■ Choose sales channels and distribution partners.
- ■ Record results and update the business plan before scaling.

Code Hills 1001 app note: This document is designed to be downloadable from the Natural Resources → Business Plan flow. The exact product formulation, regulatory requirements, supplier prices and commercial figures should be validated before launch.
